Due to a ramp up in project investigation activities comprehensive loss for the three months ended June 30, 2014, March 31, 2014, December 31, 2013, and September 30, 2013 were significantly higher compared to the previous quarters. The Company anticipates increasing or maintaining this level of losses and expenditures until such time as it identifies a mineral asset or scales back on project investigation activities to preserve cash.

1.6/1.7 Liquidity and capital resources

As at June 30, 2014, the Company had cash and cash equivalents of \$2,377,144 and working capital of \$2,320,677. Management's Discussion and Analysis

Year ended June 30, 2014 and 2013

Expressed in Canadian Dollars

1.6/1.7 Liquidity and capital resources (continued)

The Company's current working capital is sufficient for the Company to meet its immediate liquidity requirements as well as those for the next twelve months. Until such time the Company decides to acquire a mineral property and make exploration expenditure commitments, the Company's 12-month budget forecast is approximately \$500,000 on general and administration and \$500,000 on project investigation costs.

Common shares issued

During the year ended June 30, 2014, the Company completed two private placements, the November 8, 2013 issuing 4,393,000 common shares and the February 17, 2014 private placement where the Company issued 1,150,000 common shares.

Other sources of funds

As at June 30, 2014, the other sources of funds potentially available to the Company are through the exercise of outstanding stock options with terms as follows:

Exercise price	Number outstanding at June 30, 2014	Expiry date	Number exercisable at June 30, 2014
\$ 0.51	1,580,000	Feb 17, 2019	592,500

The Company has an uncollected balance of \$44,021, which relates to GST/HST input tax credits ("ITCs") relating to fiscal years 2011 through 2013. The Company is disputing this amount since the CRA determined that no commercial activity existed within the Company during the audited period and that the ITCs for qualifying expenses are not eligible. Management disagrees with this position and has filed a notice of objection. As at the date of the MD&A, no assurance exists that the Company will be successful in its objection and that any of the amount will be refundable to the Company. Consequently, the Company has recorded a provision against the entire amount.

For the year ended Jun 30, 2014, the Company has taken the position that its ITCs for qualifying expenses are refundable given its level of business activity and support of its international operations. As at June 30, 2014, the Company recorded and claimed a refundable GST balance of \$38,246.

The Company may continue to have capital requirements in excess of its currently available resources. In the event the Company's plans change, its assumptions change or prove inaccurate, or its capital resources in addition to projected cash flow, if any, prove to be insufficient to fund operations, the Company may be required to seek additional financing. There can be no assurance that the Company will have sufficient financing to meet its future capital requirements or that additional financing will be available on terms acceptable to the Company in the future.

The Company does not utilize off-balance sheet arrangements.
